

## READING PASSAGE 1

### Wearable Technology and Health Monitoring

**A** In recent years, wearable technology and health monitoring has attracted considerable attention from both the academic community and the general public. This growing interest reflects a broader recognition of the importance of this topic for understanding some of the most pressing challenges facing contemporary society.

**B** Historically, scholarly understanding of this topic was limited by both theoretical frameworks and available methodologies. Early researchers operated within relatively narrow conceptual boundaries, and their findings, while groundbreaking for their time, often failed to capture the full complexity of the phenomena they sought to explain. The development of new research tools and analytical techniques in the latter half of the twentieth century fundamentally transformed the landscape, enabling scholars to investigate questions that had previously been considered beyond the reach of empirical inquiry.

**C** Contemporary research has identified several critical factors that determine outcomes in this domain. The interplay between environmental conditions, technological capabilities, and social organisation creates a complex adaptive system in which small changes can produce disproportionately large effects. Understanding these dynamics requires analytical approaches that move beyond simple cause-and-effect reasoning to embrace the principles of complexity science and systems thinking.

**D** The empirical record is further strengthened by a series of meta-analyses that have synthesised findings from hundreds of individual studies. These comprehensive reviews have consistently identified moderate to large effect sizes, with the most robust findings demonstrating remarkable consistency across different research designs, measurement approaches, and analytical strategies. This convergence of evidence from multiple independent lines of inquiry considerably strengthens confidence in the validity of the core theoretical propositions.

**E** The practical application of research findings has proven more challenging than many initially anticipated. The translation of academic knowledge into actionable policy recommendations requires navigating a complex landscape of political constraints, economic interests, and social dynamics that academic models often simplify or overlook. Implementation failures in several high-profile initiatives have underscored the gap between theoretical understanding and practical capacity, prompting calls for more engaged and context-sensitive approaches to research.

**F** Looking ahead, the field stands at a critical juncture. Emerging technologies offer unprecedented opportunities for data collection and analysis, potentially enabling researchers to address questions that have long remained beyond the reach of empirical investigation. At the same time, the accelerating pace of social and technological change means that the phenomena under study are themselves evolving, requiring theoretical frameworks that can accommodate dynamism and discontinuity rather than assuming stability and equilibrium.

**G** The evidence reviewed above demonstrates both the substantial achievements of research in this field and the significant work that remains to be done. As new tools and theoretical perspectives become available, and as the phenomena themselves continue to evolve, the research community will need to maintain both rigour in its methods and openness to new ideas. The stakes are high, for the questions addressed by this research bear directly on some of the most important challenges facing humanity in the twenty-first century.

---

#### Question 1

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

- 1 According to the passage, structural factors include economic incentives, institutional frameworks, and \_\_\_\_\_.

**Question 2**

**Do the following statements agree with the information given in the passage?**

**Write TRUE if the statement agrees with the information**

**Write FALSE if the statement contradicts the information**

**Write NOT GIVEN if there is no information on this**

- 2 The author believes that all research questions in this field have been answered.

**Questions 3–4**

**Choose the correct letter, A, B, C or D.**

- 3 The passage indicates that critics have raised concerns about:
- A. minimal impact
  - B. creating underlying conditions for action
  - C. determining individual choices directly
  - D. irrelevant to outcomes
- 4 According to the passage, what is one of the key factors identified by researchers?
- A. pessimism about the future
  - B. cautious optimism with acknowledgment of challenges
  - C. complete certainty about outcomes
  - D. indifference to practical applications

**Question 5**

**Do the following statements agree with the information given in the passage?**

**Write TRUE if the statement agrees with the information**

**Write FALSE if the statement contradicts the information**

**Write NOT GIVEN if there is no information on this**

- 5 All critics agree that the research findings are universally applicable.

**Question 6**

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

- 6 Researchers used data from more than \_\_\_\_\_ countries in the landmark study.

**Question 7**

**Do the following statements agree with the information given in the passage?**

**Write TRUE if the statement agrees with the information**

**Write FALSE if the statement contradicts the information**

**Write NOT GIVEN if there is no information on this**

- 7 Policy-makers have fully implemented all research recommendations.

**Question 8**

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

- 8 According to the text, cognitive processes shape the \_\_\_\_\_ that people make.

**Question 9**

**Do the following statements agree with the information given in the passage?**

**Write TRUE if the statement agrees with the information**

**Write FALSE if the statement contradicts the information**

**Write NOT GIVEN if there is no information on this**

- 9 Contemporary understanding of this topic is more sophisticated than it was fifty years ago.

**Questions 10–12**

**Choose the correct letter, A, B, C or D.**

- 10 What finding emerged from the landmark study discussed in the passage?

A. inconsistent results across cultures  
B. a consistent pattern across diverse contexts  
C. no measurable effects  
D. effects limited to Western countries

- 11 The meta-analyses cited in the passage reveal that:

A. too much data collection  
B. the generalisability of findings across contexts  
C. insufficient government funding  
D. overly complex statistical methods

- 12 The meta-analyses cited in the passage reveal that:

A. pessimism about the future  
B. cautious optimism with acknowledgment of challenges  
C. complete certainty about outcomes  
D. indifference to practical applications

**Question 13**

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

**13** Case studies have documented the effects of \_\_\_\_\_ change on the system.
