

## READING PASSAGE 2

### The Development of Smart Home Technology

**A** The study of the development of smart home technology has undergone a remarkable transformation over the past several decades. What was once a niche area of academic inquiry has developed into a rich and diverse field of research, drawing on insights from a wide range of disciplines and theoretical traditions.

**B** Historically, scholarly understanding of this topic was limited by both theoretical frameworks and available methodologies. Early researchers operated within relatively narrow conceptual boundaries, and their findings, while groundbreaking for their time, often failed to capture the full complexity of the phenomena they sought to explain. The development of new research tools and analytical techniques in the latter half of the twentieth century fundamentally transformed the landscape, enabling scholars to investigate questions that had previously been considered beyond the reach of empirical inquiry.

**C** The mechanisms underlying these phenomena operate at multiple levels of analysis, from the micro-level of individual decision-making to the macro-level of institutional and structural change. At the individual level, cognitive processes, emotional responses, and social influences shape the choices that people make. At the organisational level, formal rules, informal norms, and power dynamics govern collective action. At the societal level, historical legacies, cultural values, and political structures create the broad context within which lower-level processes unfold.

**D** The empirical record is further strengthened by a series of meta-analyses that have synthesised findings from hundreds of individual studies. These comprehensive reviews have consistently identified moderate to large effect sizes, with the most robust findings demonstrating remarkable consistency across different research designs, measurement approaches, and analytical strategies. This convergence of evidence from multiple independent lines of inquiry considerably strengthens confidence in the validity of the core theoretical propositions.

**E** Several unresolved debates continue to animate scholarly discussion in this field. Perhaps the most prominent concerns the relative importance of structural versus agentic factors in determining outcomes. While some researchers emphasise the constraining power of institutional and economic structures, others highlight the capacity of individuals and groups to exercise agency and effect change even within seemingly restrictive contexts. This debate has significant practical implications, as it shapes recommendations for policy interventions and institutional reforms.

**F** The implications of this body of research extend well beyond the academy. As societies grapple with increasingly complex challenges, the insights generated by scholarly inquiry in this domain have the potential to inform more effective and equitable policy responses. Realising this potential, however, will require sustained investment in both fundamental research and the translational infrastructure needed to convert knowledge into action.

**G** In conclusion, the study of the development of smart home technology represents a vital and dynamic area of contemporary research. The progress that has been made in understanding the key mechanisms and dynamics provides a solid foundation for both further scholarly inquiry and practical application. The challenges that remain should be seen not as reasons for discouragement but as opportunities for continued intellectual growth and social contribution.

---

#### Questions 1–4

**Do the following statements agree with the information given in the passage?**

**Write TRUE if the statement agrees with the information**

**Write FALSE if the statement contradicts the information**

**Write NOT GIVEN if there is no information on this**

- 1 Contemporary understanding of this topic is more sophisticated than it was fifty years ago.
- 2 The author believes that all research questions in this field have been answered.
- 3 Early researchers had access to the same technologies as modern scholars.
- 4 The landmark study discussed in the passage involved participants from multiple countries.

**Questions 5–6**

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

- 5 Case studies have documented the effects of \_\_\_\_\_ change on the system.
- 6 Researchers used data from more than \_\_\_\_\_ countries in the landmark study.

**Questions 7–8**

**Choose the correct letter, A, B, C or D.**

- 7 The author suggests that early studies in this field were limited by:
  - A. inconsistent results across cultures
  - B. a consistent pattern across diverse contexts
  - C. no measurable effects
  - D. effects limited to Western countries
- 8 The passage indicates that critics have raised concerns about:
  - A. economic incentives and institutional constraints
  - B. individual personality traits
  - C. random chance
  - D. government policies alone

**Questions 9–10**

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

- 9 According to the passage, structural factors include economic incentives, institutional frameworks, and \_\_\_\_\_.
- 10 The author notes that researchers have called for more \_\_\_\_\_ approaches to investigation.

**Questions 11–13**

**Choose the correct letter, A, B, C or D.**

- 11** What finding emerged from the landmark study discussed in the passage?
- A. excessive research funding
  - B. translating academic findings into practical policy
  - C. lack of public interest
  - D. too many international collaborations
- 12** According to the passage, what is one of the key factors identified by researchers?
- A. economic incentives and institutional constraints
  - B. individual personality traits
  - C. random chance
  - D. government policies alone
- 13** The passage indicates that critics have raised concerns about:
- A. too much data collection
  - B. the generalisability of findings across contexts
  - C. insufficient government funding
  - D. overly complex statistical methods
