

## READING PASSAGE 2

### Augmented Reality in Education

**A** The study of augmented reality in education has undergone a remarkable transformation over the past several decades. What was once a niche area of academic inquiry has developed into a rich and diverse field of research, drawing on insights from a wide range of disciplines and theoretical traditions.

**B** The origins of contemporary research in this area can be traced to pioneering studies conducted during the mid-twentieth century. These early investigations, though constrained by the technological and methodological limitations of their era, established foundational principles that continue to inform current scholarship. Successive generations of researchers have built upon these foundations, progressively refining theoretical models and expanding the empirical evidence base through increasingly sophisticated research designs.

**C** At the core of current understanding lies a set of interrelated mechanisms that collectively explain the observed patterns and outcomes. First, structural factors create the underlying conditions within which individual and collective action takes place. These structural dimensions include economic incentives, institutional frameworks, and cultural norms that shape behaviour in ways that are often not immediately apparent to the actors themselves. Second, dynamic feedback processes amplify or dampen initial effects, generating patterns of change that can diverge substantially from what linear models would predict.

**D** A substantial body of empirical evidence supports these theoretical frameworks. A landmark study conducted by researchers at leading international institutions analysed data spanning a thirty-year period and involving participants from more than forty countries. The findings revealed a consistent pattern of results that held across diverse cultural and economic contexts, suggesting that the identified mechanisms operate with considerable universality. The magnitude of the observed effects was particularly striking, with the key variables accounting for a substantial proportion of the total variance in outcomes.

**E** The practical application of research findings has proven more challenging than many initially anticipated. The translation of academic knowledge into actionable policy recommendations requires navigating a complex landscape of political constraints, economic interests, and social dynamics that academic models often simplify or overlook. Implementation failures in several high-profile initiatives have underscored the gap between theoretical understanding and practical capacity, prompting calls for more engaged and context-sensitive approaches to research.

**F** The future trajectory of research in this area will likely be shaped by several converging trends. Advances in computational methods and data science are opening up new analytical possibilities, enabling researchers to detect patterns and test hypotheses at scales that were previously unimaginable. Simultaneously, growing recognition of the importance of interdisciplinary collaboration is breaking down traditional barriers between fields and fostering innovative syntheses of diverse theoretical perspectives.

**G** The evidence reviewed above demonstrates both the substantial achievements of research in this field and the significant work that remains to be done. As new tools and theoretical perspectives become available, and as the phenomena themselves continue to evolve, the research community will need to maintain both rigour in its methods and openness to new ideas. The stakes are high, for the questions addressed by this research bear directly on some of the most important challenges facing humanity in the twenty-first century.

---

#### Question 1

**Choose the correct letter, A, B, C or D.**

- 1 What does the passage identify as a significant challenge to current understanding?
- A. weak effects across studies
  - B. moderate to large effect sizes with consistency
  - C. contradictory findings
  - D. results only in specific populations

**Questions 2–3**

**Do the following statements agree with the information given in the passage?**

**Write TRUE if the statement agrees with the information**

**Write FALSE if the statement contradicts the information**

**Write NOT GIVEN if there is no information on this**

- 2 The author believes that all research questions in this field have been answered.
- 3 Early researchers had access to the same technologies as modern scholars.

**Question 4**

**Choose the correct letter, A, B, C or D.**

- 4 The author suggests that early studies in this field were limited by:
- A. weak effects across studies
  - B. moderate to large effect sizes with consistency
  - C. contradictory findings
  - D. results only in specific populations

**Question 5**

**Do the following statements agree with the information given in the passage?**

**Write TRUE if the statement agrees with the information**

**Write FALSE if the statement contradicts the information**

**Write NOT GIVEN if there is no information on this**

- 5 All critics agree that the research findings are universally applicable.

**Question 6**

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

- 6 Researchers used data from more than \_\_\_\_\_ countries in the landmark study.

**Question 7**

**Do the following statements agree with the information given in the passage?**

**Write TRUE if the statement agrees with the information**

**Write FALSE if the statement contradicts the information**

**Write NOT GIVEN if there is no information on this**

7 Policy-makers have fully implemented all research recommendations.

**Question 8**

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

8 According to the text, cognitive processes shape the \_\_\_\_\_ that people make.

**Question 9**

**Choose the correct letter, A, B, C or D.**

9 What finding emerged from the landmark study discussed in the passage?

- A. excessive funding
- B. theoretical and methodological limitations
- C. public interest
- D. international collaboration

**Questions 10–11**

**Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.**

10 The author notes that researchers have called for more \_\_\_\_\_ approaches to investigation.

11 Dynamic \_\_\_\_\_ processes can amplify or dampen initial effects in complex systems.

**Questions 12–13**

**Choose the correct letter, A, B, C or D.**

12 Which of the following best describes the author's view on future developments?

- A. economic incentives and institutional constraints
- B. individual personality traits
- C. random chance
- D. government policies alone

13 Which of the following best describes the author's view on future developments?

- A. economic incentives and institutional constraints
- B. individual personality traits
- C. random chance
- D. government policies alone
