

READING PASSAGE 1

Geothermal Energy Potential

A Geothermal Energy Potential has emerged as one of the most significant topics in contemporary academic discourse. The complexity and multifaceted nature of this subject have attracted the attention of researchers, policymakers, and practitioners across multiple disciplines, all seeking to understand its implications for the future.

B The origins of contemporary research in this area can be traced to pioneering studies conducted during the mid-twentieth century. These early investigations, though constrained by the technological and methodological limitations of their era, established foundational principles that continue to inform current scholarship. Successive generations of researchers have built upon these foundations, progressively refining theoretical models and expanding the empirical evidence base through increasingly sophisticated research designs.

C The mechanisms underlying these phenomena operate at multiple levels of analysis, from the micro-level of individual decision-making to the macro-level of institutional and structural change. At the individual level, cognitive processes, emotional responses, and social influences shape the choices that people make. At the organisational level, formal rules, informal norms, and power dynamics govern collective action. At the societal level, historical legacies, cultural values, and political structures create the broad context within which lower-level processes unfold.

D A substantial body of empirical evidence supports these theoretical frameworks. A landmark study conducted by researchers at leading international institutions analysed data spanning a thirty-year period and involving participants from more than forty countries. The findings revealed a consistent pattern of results that held across diverse cultural and economic contexts, suggesting that the identified mechanisms operate with considerable universality. The magnitude of the observed effects was particularly striking, with the key variables accounting for a substantial proportion of the total variance in outcomes.

E The practical application of research findings has proven more challenging than many initially anticipated. The translation of academic knowledge into actionable policy recommendations requires navigating a complex landscape of political constraints, economic interests, and social dynamics that academic models often simplify or overlook. Implementation failures in several high-profile initiatives have underscored the gap between theoretical understanding and practical capacity, prompting calls for more engaged and context-sensitive approaches to research.

F The future trajectory of research in this area will likely be shaped by several converging trends. Advances in computational methods and data science are opening up new analytical possibilities, enabling researchers to detect patterns and test hypotheses at scales that were previously unimaginable. Simultaneously, growing recognition of the importance of interdisciplinary collaboration is breaking down traditional barriers between fields and fostering innovative syntheses of diverse theoretical perspectives.

G In conclusion, the study of geothermal energy potential represents a vital and dynamic area of contemporary research. The progress that has been made in understanding the key mechanisms and dynamics provides a solid foundation for both further scholarly inquiry and practical application. The challenges that remain should be seen not as reasons for discouragement but as opportunities for continued intellectual growth and social contribution.

Questions 1–2

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

- 1 According to the passage, structural factors include economic incentives, institutional frameworks, and _____.
- 2 The author notes that researchers have called for more _____ approaches to investigation.

Question 3

Do the following statements agree with the information given in the passage?

Write TRUE if the statement agrees with the information

Write FALSE if the statement contradicts the information

Write NOT GIVEN if there is no information on this

- 3 Early researchers had access to the same technologies as modern scholars.

Question 4

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

- 4 The landmark study analysed data spanning a period of _____ years.

Questions 5–6

Do the following statements agree with the information given in the passage?

Write TRUE if the statement agrees with the information

Write FALSE if the statement contradicts the information

Write NOT GIVEN if there is no information on this

- 5 All critics agree that the research findings are universally applicable.
- 6 The passage suggests that structural factors are less important than individual choices.

Questions 7–8

Choose the correct letter, A, B, C or D.

- 7 The meta-analyses cited in the passage reveal that:
 - A. excessive research funding
 - B. translating academic findings into practical policy
 - C. lack of public interest
 - D. too many international collaborations
- 8 Which of the following best describes the author's view on future developments?
 - A. inconsistent results across cultures
 - B. a consistent pattern across diverse contexts
 - C. no measurable effects
 - D. effects limited to Western countries

Question 9

Do the following statements agree with the information given in the passage?

Write TRUE if the statement agrees with the information

Write FALSE if the statement contradicts the information

Write NOT GIVEN if there is no information on this

- 9 Contemporary understanding of this topic is more sophisticated than it was fifty years ago.

Questions 10–11

Choose the correct letter, A, B, C or D.

- 10 The passage indicates that critics have raised concerns about:

- A. economic incentives and institutional constraints
- B. individual personality traits
- C. random chance
- D. government policies alone

- 11 The passage indicates that critics have raised concerns about:

- A. too much data collection
- B. the generalisability of findings across contexts
- C. insufficient government funding
- D. overly complex statistical methods

Question 12

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

- 12 The landmark study analysed data spanning a period of _____ years.

Question 13

Choose the correct letter, A, B, C or D.

- 13 The meta-analyses cited in the passage reveal that:

- A. too much data collection
- B. the generalisability of findings across contexts
- C. insufficient government funding
- D. overly complex statistical methods
