

READING PASSAGE 1

The Placebo Effect in Clinical Trials

A The study of the placebo effect in clinical trials has undergone a remarkable transformation over the past several decades. What was once a niche area of academic inquiry has developed into a rich and diverse field of research, drawing on insights from a wide range of disciplines and theoretical traditions.

B The origins of contemporary research in this area can be traced to pioneering studies conducted during the mid-twentieth century. These early investigations, though constrained by the technological and methodological limitations of their era, established foundational principles that continue to inform current scholarship. Successive generations of researchers have built upon these foundations, progressively refining theoretical models and expanding the empirical evidence base through increasingly sophisticated research designs.

C At the core of current understanding lies a set of interrelated mechanisms that collectively explain the observed patterns and outcomes. First, structural factors create the underlying conditions within which individual and collective action takes place. These structural dimensions include economic incentives, institutional frameworks, and cultural norms that shape behaviour in ways that are often not immediately apparent to the actors themselves. Second, dynamic feedback processes amplify or dampen initial effects, generating patterns of change that can diverge substantially from what linear models would predict.

D A substantial body of empirical evidence supports these theoretical frameworks. A landmark study conducted by researchers at leading international institutions analysed data spanning a thirty-year period and involving participants from more than forty countries. The findings revealed a consistent pattern of results that held across diverse cultural and economic contexts, suggesting that the identified mechanisms operate with considerable universality. The magnitude of the observed effects was particularly striking, with the key variables accounting for a substantial proportion of the total variance in outcomes.

E Despite the substantial progress that has been made, significant challenges and controversies remain. Critics have raised important methodological concerns regarding the generalisability of findings derived from studies conducted in specific contexts. The predominance of research carried out in Western, educated, industrialised, rich, and democratic societies raises questions about the applicability of current theories to populations with different cultural, economic, and political circumstances. Furthermore, the reliance on cross-sectional designs in much of the existing literature limits the capacity to draw strong causal inferences.

F The future trajectory of research in this area will likely be shaped by several converging trends. Advances in computational methods and data science are opening up new analytical possibilities, enabling researchers to detect patterns and test hypotheses at scales that were previously unimaginable. Simultaneously, growing recognition of the importance of interdisciplinary collaboration is breaking down traditional barriers between fields and fostering innovative syntheses of diverse theoretical perspectives.

G The evidence reviewed above demonstrates both the substantial achievements of research in this field and the significant work that remains to be done. As new tools and theoretical perspectives become available, and as the phenomena themselves continue to evolve, the research community will need to maintain both rigour in its methods and openness to new ideas. The stakes are high, for the questions addressed by this research bear directly on some of the most important challenges facing humanity in the twenty-first century.

Question 1

Do the following statements agree with the information given in the passage?

Write TRUE if the statement agrees with the information

Write FALSE if the statement contradicts the information

Write NOT GIVEN if there is no information on this

- 1 Contemporary understanding of this topic is more sophisticated than it was fifty years ago.

Question 2

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

- 2 The author notes that researchers have called for more _____ approaches to investigation.

Question 3

Choose the correct letter, A, B, C or D.

- 3 Which of the following best describes the author's view on future developments?
- A. pessimism about the future
 - B. cautious optimism with acknowledgment of challenges
 - C. complete certainty about outcomes
 - D. indifference to practical applications

Question 4

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

- 4 The landmark study analysed data spanning a period of _____ years.

Question 5

Choose the correct letter, A, B, C or D.

- 5 Which of the following best describes the author's view on future developments?
- A. too much data collection
 - B. the generalisability of findings across contexts
 - C. insufficient government funding
 - D. overly complex statistical methods

Question 6

Do the following statements agree with the information given in the passage?

Write TRUE if the statement agrees with the information

Write FALSE if the statement contradicts the information

Write NOT GIVEN if there is no information on this

- 6 The passage suggests that structural factors are less important than individual choices.

Questions 7–8

Choose the correct letter, A, B, C or D.

7 According to the passage, what is one of the key factors identified by researchers?

- A. excessive research funding
- B. translating academic findings into practical policy
- C. lack of public interest
- D. too many international collaborations

8 According to the text, what role do structural factors play?

- A. excessive research funding
- B. translating academic findings into practical policy
- C. lack of public interest
- D. too many international collaborations

Question 9

Do the following statements agree with the information given in the passage?

Write TRUE if the statement agrees with the information

Write FALSE if the statement contradicts the information

Write NOT GIVEN if there is no information on this

9 Contemporary understanding of this topic is more sophisticated than it was fifty years ago.

Question 10

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

10 The author notes that researchers have called for more _____ approaches to investigation.

Question 11

Choose the correct letter, A, B, C or D.

11 The passage indicates that critics have raised concerns about:

- A. too much data collection
- B. the generalisability of findings across contexts
- C. insufficient government funding
- D. overly complex statistical methods

Question 12

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

12 The landmark study analysed data spanning a period of _____ years.

Question 13

Do the following statements agree with the information given in the passage?

Write TRUE if the statement agrees with the information

Write FALSE if the statement contradicts the information

Write NOT GIVEN if there is no information on this

- 13** All critics agree that the research findings are universally applicable.
