

READING PASSAGE 2

The Geography of Diamond and Mineral Resources

A The Geography of Diamond and Mineral Resources has emerged as one of the most significant topics in contemporary academic discourse. The complexity and multifaceted nature of this subject have attracted the attention of researchers, policymakers, and practitioners across multiple disciplines, all seeking to understand its implications for the future.

B Historically, scholarly understanding of this topic was limited by both theoretical frameworks and available methodologies. Early researchers operated within relatively narrow conceptual boundaries, and their findings, while groundbreaking for their time, often failed to capture the full complexity of the phenomena they sought to explain. The development of new research tools and analytical techniques in the latter half of the twentieth century fundamentally transformed the landscape, enabling scholars to investigate questions that had previously been considered beyond the reach of empirical inquiry.

C The mechanisms underlying these phenomena operate at multiple levels of analysis, from the micro-level of individual decision-making to the macro-level of institutional and structural change. At the individual level, cognitive processes, emotional responses, and social influences shape the choices that people make. At the organisational level, formal rules, informal norms, and power dynamics govern collective action. At the societal level, historical legacies, cultural values, and political structures create the broad context within which lower-level processes unfold.

D A substantial body of empirical evidence supports these theoretical frameworks. A landmark study conducted by researchers at leading international institutions analysed data spanning a thirty-year period and involving participants from more than forty countries. The findings revealed a consistent pattern of results that held across diverse cultural and economic contexts, suggesting that the identified mechanisms operate with considerable universality. The magnitude of the observed effects was particularly striking, with the key variables accounting for a substantial proportion of the total variance in outcomes.

E Despite the substantial progress that has been made, significant challenges and controversies remain. Critics have raised important methodological concerns regarding the generalisability of findings derived from studies conducted in specific contexts. The predominance of research carried out in Western, educated, industrialised, rich, and democratic societies raises questions about the applicability of current theories to populations with different cultural, economic, and political circumstances. Furthermore, the reliance on cross-sectional designs in much of the existing literature limits the capacity to draw strong causal inferences.

F The future trajectory of research in this area will likely be shaped by several converging trends. Advances in computational methods and data science are opening up new analytical possibilities, enabling researchers to detect patterns and test hypotheses at scales that were previously unimaginable. Simultaneously, growing recognition of the importance of interdisciplinary collaboration is breaking down traditional barriers between fields and fostering innovative syntheses of diverse theoretical perspectives.

G In conclusion, the study of the geography of diamond and mineral resources represents a vital and dynamic area of contemporary research. The progress that has been made in understanding the key mechanisms and dynamics provides a solid foundation for both further scholarly inquiry and practical application. The challenges that remain should be seen not as reasons for discouragement but as opportunities for continued intellectual growth and social contribution.

Question 1

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

- 1 According to the passage, structural factors include economic incentives, institutional frameworks, and _____.

Questions 2–5

Do the following statements agree with the information given in the passage?

Write TRUE if the statement agrees with the information

Write FALSE if the statement contradicts the information

Write NOT GIVEN if there is no information on this

- 2 The author believes that all research questions in this field have been answered.
- 3 Early researchers had access to the same technologies as modern scholars.
- 4 The landmark study discussed in the passage involved participants from multiple countries.
- 5 All critics agree that the research findings are universally applicable.

Questions 6–7

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

- 6 Researchers used data from more than _____ countries in the landmark study.
- 7 The passage identifies power _____ as a key factor at the organisational level.

Questions 8–9

Choose the correct letter, A, B, C or D.

- 8 The passage indicates that critics have raised concerns about:
- A. too much data collection
 - B. the generalisability of findings across contexts
 - C. insufficient government funding
 - D. overly complex statistical methods
- 9 The meta-analyses cited in the passage reveal that:
- A. pessimism about the future
 - B. cautious optimism with acknowledgment of challenges
 - C. complete certainty about outcomes
 - D. indifference to practical applications

Question 10

Complete the sentences below. Choose NO MORE THAN THREE WORDS from the passage for each answer.

10 The author notes that researchers have called for more _____ approaches to investigation.

Questions 11–13

Choose the correct letter, A, B, C or D.

11 The author suggests that early studies in this field were limited by:

- A. minimal impact
- B. creating underlying conditions for action
- C. determining individual choices directly
- D. irrelevant to outcomes

12 The meta-analyses cited in the passage reveal that:

- A. inconsistent results across cultures
- B. a consistent pattern across diverse contexts
- C. no measurable effects
- D. effects limited to Western countries

13 According to the text, what role do structural factors play?

- A. excessive funding
- B. theoretical and methodological limitations
- C. public interest
- D. international collaboration
